TOOLS, PARTS AND RESOURCES FOR EVERY SHOP, EVERY DAY

## VEHICLE DISPLAY RAMP

The V1 Vehicle display ramp is an innovative display to promote vehicles and their components. Each unit, comprised of a portable five-piece modular design, provides the user with a multitude of tilts, twists and viewing angles for any display, says maker. With contemporary styling, each unit is made of 100 percent galvanized steel and can be used indoors or out. In addition, the ramps are designed to be low maintenance and store easily.

## TIRE PRESSURE MONITORING SYSTEMS

A line of tire pressure monitoring systems (TPMS) replacement and service parts are now available to the aftermarket. The TPMS sensor assembly service parts – the valve core, valve nut, valve cap, seal and seal washer – all need to be replaced each time a tire is serviced or damaged, as per manufacturers' recommendations. As TPMS-equipped vehicles increase in numbers, having an adequate supply of replacement and service parts is becoming more necessary.

## ELECTRICAL TOOLS

Sta-Kon High Temperature Wire Joints have been designed as a wire crimping solution for high-temperature environments, such as automotive wiring harnesses or lighting ballast power connections. Made of a molded one-piece nylon housing for electrical insulation, this crimping tool is rated for temperatures up to 302° F, as well as being rated for up to 600 volts. The tool is available in three sizes.

## DIAGNOSTIC TOOL

The next generation of the MODIS automotive diagnostic system has been released. A more powerful processor allows technicians to rapidly diagnose and confirm even complex problems from a vehicle's advanced on-board systems and components, says company. The unit delivers enhanced domestic and Asian vehicle scan tool coverage; optional European import coverage is available. The tool's modular design is expandable, eliminating obsolescence.
